I.) To a question; as to relevance; there is within a bi-partite set that of one in-exclusive 'third' alternative and exterior 'piece' of which is game-theoretic as a 'stated' element; to which establishes a 'given;' when provided by two.

II.) To it's answer in I.) the relation of ordered time of events removably establishes a known; for in that of just as one pre-consideration of the alternation of two; presumptively pre-considerate two; 'included' in a third as four apart finds the inclusion of a derivative of five; that of which is the resumption later and yet to be established of a full fold.

III.) Then; as in the stated question of the piece; as resolved to the self; whom is two; there apart from four; these of one; to considerate end; known established, and taken participle of their's in two; yet of three and four; explain in one immeasurable extension that of life for in question; as to presence and absence a yet established completion in a IV.)

IV.) To therefore what 'is' presentable; there in what are of any two; a non-prediction in end; is established as then a beginning in it's alternative of there in a 'from' what is excepted of the third in III.) of their's of participance in whole and one by in going first; under it's reduction the explanation of difference in then alone what is given of any of these.

V.) By in what so is it's remainder; there to a loss of what is expressed; for intention; the difference of yet so then as apart; togetherness of two pieces; under relation of pre-emptive activity; curtails that of loss to what is yet these once foretaken of steps; to express that II.) is in IV.) by in III.) priorly established of life for death; to which no one is real.

Therefore; in these V.):

a.) Giving of a step to one of a positioned contrast in division prior multiple of two in five remainder to four is one step to which with intention; any five open the guarantee of a stated answer of life for life and completion yet to done.

b.) Taking that of what so is a participance in the third yet considered as the second; there is a step before priorly the given of a third to three of what is below one; therefrom to it's reduction to two; of what alone remains as in then two.

c.) To what is established; the curtailment of a differed notion of four is formed; by then in two relations of which expressedly establish no patterned element; nor extreme but of given to three of what is a fourth replacement of given.

d.) Establishing then a total end; all remainder of life is salvaged by then in what is three sides meeting under which one retractile question knows in total what is special of that of their whole and known terminal end in yet three.

e.) To find of what is sought; the claim established; a making in what so is departed to life; that of honesty and trust to finding of a key to self is the only known; then of the entry to which remarkably stands apart from yet any

two.

Outcomes:

- 1.) For then in what is taken; and given; sharing to trusted relationships; yields it's provision to any culture and historical basis; the foundation of a life saved for in that of another; of a person in retrospect of non-division of them.
- 2.) To of what is expressed in quality; the provision of what is kept; establishes a known; to which is it's then as once established epistimological foundational sense; to a people afar; of what is written and known in one position.
- 3.) For of what is provided; any two of their way and manner produce a completion in yet a foretold of presage to which inclusively it is 'we' who so non-co-determinantly under exception validly assume that of freed non-declaration.
- 4.) Peace; for then in a contest of attrition; is the knowable entry into it's stated self reserve; of apart what in whole is the conditional but non-participant known of an established truth to which for in each so provided end each survives.
- 5.) Excepting that of any three; to a purposeful end; what is reclaimed of a priorly given held truth; the manner of a symbolic return addresses each work; to then in it's intial step that of all sides of mutual or contractual obligation.

Side relation (principle):

Under the principle of provision to end; one reclaimed position for in deflection of a way to manner of injective status of relation of a domain self addresses yet it's consideration of what so aside is taken of difference; yet of inclusion of any two for then in one following and one in leading; the known for in one is of a past orientation; and that of five then as alone an exception to the declaration of a difference in yet it's remainder; which by reduction is spared of their's for then in what so exceptably includes the manner of a majority; to then alone consider of what is freed of safety to all.
