

# Diplomatic Intimacy and its Role in Archway's of Politic

A Request for a Fair Consensus to: Peer Associate Subsidiary Archtural & Advocacy Assignment

**P.R.S.M.B.** - 517-21-1419 - 12/29/1982

In plea and process of a review basis, under consideration of the current arena of choice, mental overbearing conditional appropriation and utility of evidenced computational dialect and informed service of the nation of the United States.

I would be, without [sic.] reminder in a formative process without the role as such in-bearing, played by my peer's and associates at UNM, and the given of a Maternal Guardianship and Conservator Sheila L. Miles [dic.] - of its process, in my treatment, however, the dialog and dispute of a voter check-sum afforded me few if any opportune bases for reprodiation of a checks and balances in the process of federal oversight\* to be afforded as such on behalf of our Family [sic.]

This new, somewhat adjacent consideration remained of at-large a mutual low consideration, and was undisputed for in the mutual checks and associability of risk-assessment, but of an ideative process. It remains a questionable and highly risk associated process in the approach to a belief of natural origin, in the process of recovery, whether *as-such* naturalized to sexual reproductive right or a medical process of review, of which co-adoptively does not appoint means of a complete recovery [sic. - addressee] in appointed mutual agreeability, to weights and schedules. The means *\*pointed* [remain then as such] outside the co-adjointing membership of a naturalized citizen to some considerations and a non-naturalized associate of peer networks. This much is undisputed, addend.

Thus, it serves the policy in hearing that I would be willtofore to address the naturalized agency of my consideration per communications and means of a system without dichotomistic precategory addressee, appointed in reference to a secular and undivided basis.

I would appreciate, *highly*, representational freedom on behalf of understudy of medical process, (non-chem./bio./gene.\*) and psychology and law, associated with the University of New Mexico, in tandem with lawfully entitled individuals.

Secondly, I would appreciate *very much so*, the agreement of an associates pro-bene, agreeable choice of economic trade and policy as considers my post benefit. Lastly, the agreed appointing of one to whom may serve as a severence clause of mutual liability to an expressed willingness of encouragement to edu.

On behalf of scientific archtural doctrine, I would plan to write a scheduleable peer check and juris processor of ethical and moral doctrinal on behalf of the proper use of sentient and otherwise primitive thinking\*-observational dialectically inclined machine utilities (MCU) - on behalf of the interadoptive (human.) and co-evolutionary *ecological* need of proper use and functional behavioral *group-associated geometric and plant/mineral/shell* iconography.

## A Pathway to a New Psychological Assumptive

A often-questionable process is *diplomatic intimacy of a process of comprehension, understanding, and development*. This co-existently, remain(s) an inalienability of a people for in the one-hand, the *potential to reclaim\**, of, and from a *dispute, process, or possessorship*.

Thus, whence\* as-such **\*one** remain(s) fair', - *entitled to a truism of self (character and personal vindication)* - at a large or marginal *\*justification*, a people remain in equipoise of the neutrality of experiential *equatement*, but often\* (from or to) of the *third identity of self*, [ghost] - we\* (or one) remain unqualified to the possessorship of an authoritarian and aggrandizement of the willingness to the courage (*of all*). Then, that as-found, for in 'ideal capacity of one' - the equatement (persuasively an archway of modern and old mannerism and opinion (in convention and ultimate)) - *is found sterile, but of the plaity and fairness of one in regress*.

So, as such, the doctrinal ethic of a dispute remains some-28 manifold inspirative belief(s) of one comparative an agreed *\*addendum*, the possessorship (for a path shared) - of life and understood boundary and sociological need (to virtue) - and (to experience) - the at-large return **beneficial noteworthiness**, of one's routine and their(s) of shared *\*valuability and viability*, within the moral equatement of empowerable qualities found in the common student, versed in the potential of comprehension.

Thus, behaviorally, to accomodate the needs of sufficiency of a world \*(modernized) to enslavement or slavery, would be the consideration of a policy bearer, thus, fairness under this persuasion, does not equate with a journalable doctrine, and is persuasively the manner of an experiential possessor of their witnessing the process and development of life and mental horizon, as a stream of awareness.

To remain-proximal is then near to the establishment of the personal vindication at one's self courage in willingness of the right of passage of a self-entitled test of virtue, to which (witted) - we do not remain as encourageable to a *\*dispute*, but laint and laying aside of the day for a mid-party afar. With this, in consideration, fair dispute and care are met, and the needs\* *of sufficiency to an end-codification of witness to oppression and objection is founded and established in-writing*.

Thusly, the accomodation of one to means of a lesser, is aprobal, and contritonal, and dispite the majority consensus, under the persuasion of a carefully and kindly appropriated rule by and for a people, with elect leadership, and process of law.

Love, remains undeparted between and of a people in-friendship and justification for unenvious process in bearing to a leverage of witnessed event(s) in historical precedent, when - *as-such* - we do not remain marginal, to the character of one in accomodation for the appropriated comprehension of their(s) and our(s), in the disputed, and undisputative right in-bearing to a people, near, and far.

This, remains the awareness of life to come, at local relationships, and is the pursuit of a virtuous and willful consent to a mandate yet to come to form, or - a mind in possession of the righ to consent to reproduce, by the free associability of means.

Dispute archway between and of regressable oppositions neither a sociological nor maximally adjustable democratic process is hindering to the progression of the process of reclaimable mannerism of becoming.
