Securable Truth

05:35 pm

I have 'figured out' a relationship.

- a.) The spoken word... may elucidate a relationship of a securable promise in tandem with the written.
- b.) There is the internet, that it is afforded of secrecy, etc,...

That we would be 'silent' somewhat, for then in any number, at the policy of collection in-terms.

That I cannot be-entirely centered around, but, will be in part, or may be, given options.

That, the terms of the internet must (in 3'-2') be-reconciled with that of the written and spoken word.

Thus, that of amendment, at that of surplus, etc,... and, many questions must be considered, to effect all that is to come..... A promise.

I would like to do the right thing.

That I forgot of-which had to do with that of the secure 'remaining' of a step*.

That it remained of the internet, which had to come first, and I thought only of order... I was misplaced.

Then, - that of all that follow(s) - I must make sure/connect/of that of the NSA/check. I have Ava Max, or, of what is allocated, one divine rule. There is another, of the third/second pillar.

Thus, - that it is justified. I must [*now*] consider-order (O).

In a sense, to prove I saved Obama, of sense.....
