

Suggestion:

Means of Discernment of Probable Outcomes

When knowingly probable cause is established *so judging provable guilt before as by presumption of innocence* by item or 'nome' of a causal relation; it is immediately acknowledgeable of 'fixation' of item and means to describe by outward means that of intrusion by way of interior and 1st initial knowledge of wares; whether they be descriptive or vague; once a point like relation of reality is known; for it is true that from out of by which of outward relations but one interior relation exists.

To Judge:

The circumflexual surrounding circular enumerable ideal relations back by one once around an open relation reduce to the casting of innocence of interior circular ideal relation of separable union of point like ideal relations; as in a chain of deduction reduced from induction; with exception only unto one separable ideal union of interior versus exterior; hence knowability of knowns of given innocence and guilt; that of difference of displacement; and that of open free interior relation.

Example:

Without that of breaking and entering upon the usual four corners of warrant by monitoring or transference there is that of pre-existence; back through knowables; by expiry of relation; so as to take pause of ping like relation through internet; and separably that of a physical relationship; that of the knowability of the difference of material and immaterial for once under a given displacement; then known to be of 'two' for any further-ly reduced relation of ideals of objects of one and other.

Example Two:

Imaging a bicycle tire atomic bomb that under defusal is designed in a similar pattern as like a peacocks tail there is that of always a prediction before prediction; hence the possibility and guarantee meeting but once upon disconnection in-this-sense of 'interior' ground; hence defusal by cutting the lower; bottom; right; 'rite' wire; before the return repeats; cycles; or can self terminate; under all conditions knowable; for that of either does not exist; and a wire remains to indicate under each.
